A) Unit-тесты / Интеграционные тесты

1. Тестирование Конфигурации (`config`)

- **Файлы:** `test_config.py`
- **Что проверяет:** Правильность загрузки JSON-файлов, валидацию полей (имя, URL, путь к парсеру).
- **Результат:** Все тесты в этом блоке **PASSED**.

```
(venv) PS C:\PyProjects\study\Software-engineering> python -m pytest tests/test_config.py --cov=ti_framework --cov-report=term-missing -v
================================================================= test session starts ==========================================================
platform win32 -- Python 3.12.8, pytest-9.0.2, pluggy-1.6.0 -- C:\PyProjects\study\Software-engineering\venv\Scripts\python.exe
cachedir: .pytest_cache
rootdir: C:\PyProjects\study\Software-engineering
configfile: pyproject.toml
plugins: cov-7.1.0
collected 6 items

tests/test_config.py::TestLoadSourceConfigs::test_load_valid_json_list PASSED                                                          [ 16%]
tests/test_config.py::TestLoadSourceConfigs::test_load_valid_json_object_with_sources PASSED                                           [ 33%]
tests/test_config.py::TestLoadSourceConfigs::test_load_missing_file_raises_error PASSED                                                [ 50%]
tests/test_config.py::TestSourceConfigModelValidation::test_valid_config_creation PASSED                                               [ 66%]
tests/test_config.py::TestSourceConfigModelValidation::test_config_with_empty_name_raises_error PASSED                                 [ 83%]
tests/test_config.py::TestSourceConfigModelValidation::test_config_with_empty_parser_path_raises_error PASSED                          [100%]
```

2. Тестирование Моделей и Валидации (`domain`)

- **Файлы:** `test_domain.py`
- **Что проверяет:** Правильность создания объектов `Snapshot`, проверка на валидность данных (например, наличие часового пояса).
- **Результат:** Все тесты в этом блоке **PASSED**.

```
(venv) PS C:\PyProjects\study\Software-engineering> python -m pytest tests/test_domain.py --cov=ti_framework --cov-report=term-missing -v
================================================================= test session starts ==========================================================
platform win32 -- Python 3.12.8, pytest-9.0.2, pluggy-1.6.0 -- C:\PyProjects\study\Software-engineering\venv\Scripts\python.exe

rootdir: C:\PyProjects\study\Software-engineering
configfile: pyproject.toml
plugins: cov-7.1.0
collected 3 items

tests/test_domain.py::TestSnapshotModelValidation::test_valid_snapshot_creation PASSED                                                 [ 33%]
tests/test_domain.py::TestSnapshotModelValidation::test_snapshot_with_naive_datetime_raises_error PASSED                               [ 66%]
tests/test_domain.py::TestSnapshotModelValidation::test_snapshot_with_empty_source_name_raises_error PASSED                            [100%]C
:\PyProjects\study\Software-engineering\venv\Lib\site-packages\coverage\inorout.py:577: CoverageWarning: Module ti_framework was previously imported, but not measure
d (module-not-measured); see https://coverage.readthedocs.io/en/7.13.5/messages.html#warning-module-not-measured
  self.warn(msg, slug="module-not-measured")
```

3. Тестирование Инфраструктуры и Хранения (`infrastructure`)

- **Файлы:** `test_infrastructure.py`
- **Что проверяет:** Функциональность файлового хранилища (запись/чтение), работу парсера конкретного типа (`Sec1275Parser`).
- **Результат:** Все тесты в этом блоке **PASSED**.

```
(venv) PS C:\PyProjects\study\Software-engineering> python -m pytest tests/test_infrastructure.py --cov=ti_framework --cov-report=term-missing -v
================================================================= test session starts ==========================================================
platform win32 -- Python 3.12.8, pytest-9.0.2, pluggy-1.6.0 -- C:\PyProjects\study\Software-engineering\venv\Scripts\python.exe
cachedir: .pytest_cache
rootdir: C:\PyProjects\study\Software-engineering
configfile: pyproject.toml
plugins: cov-7.1.0
collected 3 items

tests/test_infrastructure.py::TestSec1275Parser::test_parse_index_extracts_entries PASSED                                              [ 33%]
tests/test_infrastructure.py::TestFileSystemSnapshotStorage::test_save_and_load_snapshot PASSED                                        [ 66%]
tests/test_infrastructure.py::TestFileSystemSnapshotStorage::test_list_snapshots PASSED                                                [100%]
```

4. Тестирование Портов и Моков (`ports`)

- **Файлы:** `test_ports.py`
- **Что проверяет:** Изолированную логику компонентов, используя моки: как работает HTTP ответ (`HttpResponse`), как парсер
- обрабатывает данные, что делает скраппер при вызовах хранилища и т.д.
- **Результат:** Все тесты в этом блоке **PASSED**.

```
(venv) PS C:\PyProjects\study\Software-engineering> python -m pytest tests/test_ports.py --cov=ti_framework --cov-report=term-missing -v
============================================================================ test session starts ============================================================================
platform win32 -- Python 3.12.8, pytest-9.0.2, pluggy-1.6.0 -- C:\PyProjects\study\Software-engineering\venv\Scripts\python.exe
